DETAILED ACTION

Drawings

1. The drawings filed on November 14, 2005 are acceptable subject to correction of the informalities. The drawings contain numerous mismatches between the references numbers in the drawings and in the specification. Further, the drawings are unclear and hard to read, the drawings found in the PCT are clearer yet, still have numerous mismatches between the drawings and specification. The correction will not be held in abeyance.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

Replacement Drawing Sheets

Drawing changes must be made by presenting replacement sheets which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments section, or remarks, section of the amendment paper. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). A replacement sheet must include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and within the top margin.

Annotated Drawing Sheets

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheet(s) must be clearly labeled as "Annotated Sheet" and must be presented in the amendment or remarks section that explains the change(s) to the drawings.

Timing of Corrections

Art Unit: 3767

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

Allowable Subject Matter

2. Claim 5 is allowed. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or otherwise render obvious the structural limitations set forth in claim 5 particularly a cocking ring extending from the housing distal end and having a rear portion slidably disposed on the housing bore and a cylinder slidably disposed within said cocking ring and having a front end and a rear end with a chamber disposed proximate the front end and a sear for releasably holding said piston in the second position with the spring compressed, said sear including a sear spring and a tapered end, the sear spring causing releasable engagement of said tapered end with the piston rear head; and said cylinder rear end disposed in an operational relationship with the sear tapered end for releasing said sear from the piston rear head enabling said spring to drive said piston to said first position. Taff et al. (U.S. Patent 4,447,225) teaches puller legs (Fig.1 reference number 38) which cocks the piston (Col. 7 lines 36-38) and the medicament is injected upon the release of a latch activating a spring (Col. 8 lines 9-10). The puller legs do not have the same structure as the cocking ring or operational relationship required by claim 5. Umbaugh (U.S. Patent 6,083,197) teaches a needleless injector which has a cocking mechanism in the form of a cocking sleeve (Fig. 1 reference number 220)

Art Unit: 3767

again; this mechanism does not have the same structure or operational relationship as the cocking ring in claim 5. Landau (US 2002/0151839) teaches a separate energizing unit which cocks the injector again; this mechanism does not have the same structure or operational relationship as the cocking ring in claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a). In the instant case drawing corrections are required.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to EMILY WACHTEL whose telephone number is (571)270-3648. The examiner can normally be reached on Monday through Thursday 7:30 AM to 5:00 PM (EST).
